SOUTRON

PRODUCT FACT SHEET

CAMS OPAC

Customizable, dynamic information ingestion

OVERVIEW

The CAMS OPAC provides easy access to CAMS database records, in addition to standard retrieval and display capabilities. The OPAC enables users to ask questions, request reproductions, create accounts, request cards and more.

With CAMS, cultural organizations of all types, from archives to zoos, provide access to their collections to meet the demands of an increasingly sophisticated public.

Additional OPAC Features

- Customizable OPAC information pages.
- Multilingual user dialogue and assigning a default language for interacting with specific users.
- Browse through indexes online, allowing users to search for and select available search terms.
- Custom, site-specific search forms, data entry forms and web display pages.
- Easily attach images, videos, external documents in Word, HTML and other text formats, as well as textual information from the database record, for online access.
- Hypertext linking within the same database, across databases or to other sites.
- Statistical reports about user log-ons, database opens, searches and records viewed (individual record count or total number of records).

MODERN HYBRID RDBMS

Build powerful, customizable databases without coding

Standard to each CAMS solution is a toolkit that enables users to create custom databases designed specifically for their unique collection type, eliminating the need to rely on costly programmers and IT support. Plus, it is easy to learn with no coding expertise required. All this rich functionality means reduced digital collection creation time, which results in cost savings.

30+ years of excellence

Trusted, cost-effective and user-friendly, CAMS empowers you to manage your information without technical barriers.

Customizable and Versatile

All essential components for rapid application development are provided: a user interface, database engine, report generator and screen painter, so you can create, test and deploy quickly.

Integrated Solution

A complete information management system suitable for a wide variety of use cases.

Multilingual Support

Supports multiple languages and scripts.

Data Integration

Seamlessly integrate with other systems using XML, SQL and ODBC.

Proven Safety

With no security breaches, CAMS is one of the safest database engines available.

Protected B Status

Cleared for high-level IT and physical security, ensuring your data is always secure.

Trusted by Experts

Used in security, anti-terrorism and tracking systems, and consistently passing independent security reviews.

Improving access, search and preservation

IT safe and secure

As a cloud-based solution, we manage your database safely and securely in the cloud, reducing the strain on your IT team.

Expand Info Access

Easily integrate with other enterprise applications, with support for Single Sign-on, providing a greater opportunity to serve teams across the whole organization.

30+ Years Strong

Expertise in information management and database web technology from over 30 years of working across many industry sectors.
