CAMS Museum Collection Management System

Efficient museum collection management

OVERVIEW

With a proven track record of excellence, including three accreditations by the CHIN Collections Software Review and Heritage Canada as well as consistently ranking among the top five museum management systems worldwide, the CAMS Collection Management System (CMS) has become a globally recognized museum collections management system.

5,000+ Predefined Fields

IMPROVED MUSEUM OPERATIONS

Everything you need to manage your museum, in one product

Created to streamline and simplify the way museums, art galleries and cultural institutions manage their collections, the CAMS Collection Management System for Museums is a powerful and user-friendly collections management system that helps museums streamline operations, improve data management, and gain valuable insights into their collections.

CAMS manages the catalog, event exhibitions, buildings, art insurance (incident tracking, indemnification, valuation, provenance), circulation / item movements, conservation documentation, staff, volunteers, visitor services, and more.

Designed specifically for museums, art galleries and cultural institutions, CAMS CMS for museums, combined with the optional CAMS Trusted Data Repository (TDR) service for digital preservation, is the ideal solution for managing, organizing and preserving cultural assets.

SAAS DELIVERY

Museum Collection Management

Covers all aspects of collection management, including:

- Acquisitions, accessioning and appraisals.
- Cataloging for art, human history, natural history and specialties.
- Reproduction and publication services.
- Museum education and promotion.
- Object location, movement and control.
- Exhibition loan management.
- Loans in/out.
- Conservation and preservation.
- Risk management and valuation.

A modern CMS for museums and galleries

CAMS for Museums comes with over 5,000 predefined fields in a flexible HRDBMS that allows for customization to fit the specific needs of your institution. Whether you manage art, historical artifacts, natural history specimens or other cultural items, CAMS for Museums can be adapted to your specific data.

Customizable OPAC Portal

The easy-to-use OPAC provides simplified and experienced search modes, thesaurus operators, Boolean operators, truncation and proximity searching. Dynamic cross-asset integrated “Union” searching ensures the public can find anything at any time regardless of collection type or location.

Highly customizable collections management system

Standards-Based

Compatible with modern standards like Dublin Core, OAI, Z39.50, Z39.87 and more, ensuring compliance and interoperability.

Comprehensive Metadata Management

Easily build glossaries and manage taxonomies.

Integration

Integrates seamlessly with CAMS Archive Management and CAMS Library Management to provide a complete cultural heritage collections solution. CAMS also easily integrates with other systems through various protocols, including XML, SOAP, ODBC, API integrations, MARC import and Z39.50/87.

Easy to Use

A user-friendly interface with context-sensitive help makes it easy for staff to learn and use the system, regardless of their technical expertise.

Risk Management

Comprehensive tracking for valuations, incident reporting and conservation needs.

Safe and secure HRDBMS

The internationally proven multilingual CAMS HDBMS is one of the safest database engines available. CAMS is cleared to Protected B Status from IT and physical perspectives. Furthermore, our software has been in use for over 50 years without any security breaches. With multiple security and auditing tools built in, CAMS clients can rest assured that their data is safe and secured. CAMS has several applications built for security, anti-terrorism and tracking systems and it has consistently passed independent security reviews.

TRUSTED AND CERTIFIED

Three CHIN and Heritage Canada accreditations | Protected B Status | 30+ years, no security breaches
